

Chlorine Cartridge Kit

Chlorine Cartridge Kit
(shown assembled)

Cartridge Mount
(Comes with the PP-1 and PP-2 In-Deck Modules)

Replaceable Cartridge
Knock-outs (6)

ALL OZONE SYSTEMS REQUIRE A SANITIZER like Chlorine.

Perfect Pool Chlorine Cartridges are fill adjustable and provide approximately one months supply of sanitizer. Easy to install, it 'clicks' into place on the PP-2 and PP-3 In-Deck Modules.

Comes in 4-pack Container - enough for approximately 4-months supply.

Note: usage varies with water temperature and opening sizes on the Cartridge Kit

All Perfect Pool systems come with a One Year Limited Warranty

Chlorine is one of the most abundant chemical elements on Earth. It is ubiquitous in soils, minerals, plants and animals. Seawater is a huge reservoir of dissolved chlorine weathered from the continents and transported to the oceans by Earth's rivers.

A major advantage of chlorine is that it provides a residual level that continues to protect long after it is applied.

Why is chlorine added to swimming pool and spas?

Chlorine kills harmful microorganisms that can cause health-related problems in swimming pools and spas. Chlorine-based swimming pool and spa disinfectants help prevent swimmers' ear, athlete's foot, skin rashes and diarrhea. Legionnaires' Disease and Pontiac Fever can also be prevented with proper chlorination, particularly in the hot tub and spa environment. The U.S. Centers for Disease Control and Prevention (CDC) calls chlorine and proper pH, "the first defense against germs that can make swimmers sick." ***A major advantage is that chlorine provides a residual level that continues to protect long after it is applied..***

ORDERING

PP-CCK Perfect Pool Replaceable Chlorine Cartridge Kit - QTY: 4 - Approximately a 4 month supply
